Subject Index to Volume 3

Aluminide coatings on nickel alloys, 475
Aluminum
  effect of applied electric field on oxidation, 529, 533
  effect of on oxidation of Co–Cr alloys, 365
Aluminum–magnesium alloys
  oxidation of, 91
  oxidation of in Air, Air–SO_2 and Air–H_2S, 313

Cadmium fluoride formation, 319
Cobalt–20Cr, effect of Mn and Si on oxidation, 185
Co–Cr–Al
  oxidation behavior of, 103, 365
  selection of composition for oxidation resistance, 243
Comparison of oxidation of Fe–Cr–Al, Ni–Cr–Al, and Co–Cr–Al, 103
Copper alloys, high-temperature oxidation of, 59
Copper, oxidation at high temperatures, 291
Cracks, effects of in scale on oxidation kinetics, 539

Defect structure
  of Nb_2O_5, 33
  of thin films, 523
Diffusion
  chemical relation to oxidation, 251, 357, 361
  oxygen in ZrO_2, 1
Diffusion coatings, aluminide on nickel alloys, 475

Electric field, effect of on oxidation of Al, 529, 533

Fluoridation of cadmium, 319
Fused salts, oxidation of zircaloys in, 399

Iron, growth of whiskers on during oxidation, 453
Iron–Cr–Al, oxidation behavior of, 103
Iron–12% Ni, oxidation of at 700–1000°C, 41
Iron–1.5% Si, oxidation of at 1000°C, 15
Iron sulfide formation, 545

Kinetics
  low-pressure, high-temperature oxidation of Si, 139
  low-pressure, high-temperature oxidation of tungsten silicides, 153

Limiting factors in use of alloys, 171
Linear kinetics of FeS formation and reduction, 545
Low-pressure
  oxidation of silicon, 139
  oxidation of tungsten silicides, 153
  siliconizing of tungsten, 115
Low-temperature oxidation, 271, 275

Manganese
  effect of on oxidation of Co–20Cr, 185
  surface oxidation of in Ni–Fe alloys, 261
Mapping of oxide products, Co–Cr–Al system, 213
Molten Al–Mg alloys, oxidation of, 313

Nickel
  influence of surface preparation on structure of NiO, 463
Nickel-base alloys, aluminide coatings, 475
Ni–15Cr–6Al
  transient oxidation of, 557
Ni–7.5Cr oxidation, 571
Ni–7.5Cr–2.5 Sm_2O_3, 571

© 1971 Plenum Publishing Corporation, 227 West 17th Street, New York, N.Y. 10011.

Ni–20Cr–1ThO_2, oxidation of, 431
Ni–20Cr–2ThO_2, oxidation of, 229
NiO–CoO, concentration profiles in, 203
NiO, structure of, 463

Parabolic rate law, effect of scale cracks on kinetics, 539

Silicon
  effect of on oxidation of Co–20Cr, 185
  low-pressure, high-temperature oxidation of, 139
  surface oxidation of in Ni–Fe alloys, 261
Surface preparation, effect of on NiO formed on Ni, 463

Transport properties of Nb_2O_5, 33

Tungsten
  volatilization of by oxidation, 331
  siliconizing of, 115
Tungsten silicides, oxidation of at low-pressure, 153

Uranium alloys, oxidation properties, 497

Volatilization of tungsten by high-temperature oxidation, 331

Whiskers, growth of on Fe during oxidation, 453
Wustite–Fayalite scale on Fe–1.5 Si, 15

Zircaloys, oxidation of in fused salts at 300°C, 399
Zirconia, diffusion of oxygen in, 1

CONTENTS

Vol. 3, No. 1 **January 1971**

The Diffusion of Oxygen in Zirconia as a Function of Oxygen Pressure 1
F. J. Keneshea and D. L. Douglass

The Development of the Wustite–Fayalite Scale on an Iron–1.5 wt.% Silicon Alloy at 1000°C 15
R. C. Logani and W. W. Smeltzer

Comment on the Defect Structure and the Transport Properties of Nb_2O_5 33
R. Streiff, D. J. Poulton, and W. W. Smeltzer

Oxidation of an Fe–12% Ni Alloy in Oxygen at 700–1000°C 41
I. A. Menzies and J. Lubkiewicz

The High-Temperature Oxidation of Some Oxidation-Resistant Copper-Based Alloys 59
M. D. Sanderson and J. C. Scully

Oxidation of a Dilute Aluminum Magnesium Alloy 91
I. M. Ritchie, J. V. Sanders, and P. L. Weickhardt

Vol. 3, No. 2 **March 1971**

A Comparison of the Oxidation Behavior of Fe–Cr–Al, Ni–Cr–Al, and Co–Cr–Al Alloys 103
F. H. Stott, G. C. Wood, and M. G. Hobby

Low-Pressure, High-Temperature Siliconizing of Tungsten—I 115
C. Gelain, A. Cassuto, and P. Le Goff

Kinetics and Mechanism of Low-Pressure, High-Temperature Oxidation of Silicon—II 139
C. Gelain, A. Cassuto, and P. Le Goff

Kinetics and Mechanism of the Low-Pressure, High-Temperature Oxidation of Tungsten Silicides—III 153
C. Gelain, A. Cassuto, and P. Le Goff

Some Limiting Factors in the Use of Alloys at High Temperatures 171
G. R. Wallwork and A. Z. Hed

The Influence of Manganese and Silicon on the Oxidation Behavior of Co–20Cr 185
D. L. Douglass and J. S. Armijo

Vol. 3, No. 3 **May 1971**

Concentration Profiles in NiO–CoO Mixed Oxide Formed During Oxidation 203
A. D. Dalvi and D. E. Coates

Mapping of the Oxidation Products in the Ternary Co–Cr–Al System 213
G. R. Wallwork and A. Z. Hed

The Oxidation of Ni–20 wt.% Cr–2ThO_2 229
G. R. Wallwork and A. Z. Hed

Selection of an Alloy Composition in the Ternary Co–Cr–Al System for Oxidation Resistance 243
G. R. Wallwork and A. Z. Hed

On the Mechanism of Chemical Diffusion in Solids and Its Application to Oxidation 251
V. I. Arkharov, N. A. Balanaeva, V. N. Bogoslovskii, and N. M. Stafeeva

Surface Oxidation of Manganese and Silicon in Nickel–Iron Alloys 261
J. H. Swisher and E. O. Fuchs

Discussion of "Low-Temperature Oxidation" 271
M. J. Pryor

Reply to M. J. Pryor's Discussion of "Low-Temperature Oxidation" 275
F. P. Fehlner and N. F. Mott

The Growth of Wustite–Fayalite Nodules on an Iron–1.5 wt.% Silicon Alloy Exposed to Carbon Dioxide–Carbon Monoxide Atmospheres 279
R. C. Logani and W. W. Smeltzer

Oxidation of Copper at High Temperatures 291
S. Mrowec and A. Stokłosa

Vol. 3, No. 4 **July 1971**

Oxidation of Molten Al–Mg Alloy in Air, Air–SO_2, and Air–H_2S Atmospheres 313
D. L. Belitskus

The Formation of Cadmium Fluoride by Metal–Fluorine Reaction 319
Moshé H. Zirin

Quasiequilibrium Treatment of Gas–Solid Reactions. III. Rate of Volatilization of Tungsten by High-Temperature Oxidation 331
J. C. Batty and R. E. Stickney

Discussion of "On the Mechanism of Chemical Diffusion in Solids and Its Application to Oxidation" 357
J. D. Kuenzly

Reply to J. D. Kuenzly's Discussion of "On the Mechanism of Chemical Diffusion in Solids and Its Application to Oxidation" 361
V. I. Arkharov, N. A. Balanaeva, V. N. Bogoslovskii, and N. M. Stafeeva

The Influence of Aluminum Additions on the Oxidation of Co–Cr Alloys at 1000 and 1200°C 365
G. C. Wood and F. H. Stott

Vol. 3, No. 5 **September 1971**

Catastrophic Oxidation of Zircaloys in Fused Salts at 300°C 399
B. Cox

Oxidation Behavior of Ni–Cr–1ThO_2 Alloys at 1000 and 1200°C 431
H. H. Davis, H. C. Graham, and I. A. Kvernes

The Effect of the Oxygen Pressure and the Growth of Whiskers on the Oxidation of Pure Fe 453
Lennart Jansson and Nils-Gösta Vannerberg

The Influence of Surface Preparation on the Structures of Nickel Oxide Formed on the (100) Face of Nickel 463
T. Homma, N. N. Khoi, W. W. Smeltzer, and J. D. Embury

Mechanisms of Formation of Diffusion Aluminide Coatings on Nickel-Base Superalloys 475
G. W. Goward and D. H. Boone

Vol. 3, No. 6 **November 1971**

The Oxidation Properties of U–16.6 at.% Nb–5.6 at.% Zr and U–21 at.% Nb 497
J. V. Cathcart, R. E. Pawel, and G. F. Petersen

The Defect Structure of Thin Oxide Films on Aluminum 523
M. J. Pryor

Comments on "The Effect of an Applied Electric Field on the Oxidation of Aluminum in the Temperature Range 50–400°C" 529
Brian Cox

Reply to Comments by B. Cox on "The Effect of an Applied Electric Field on the Oxidation of Aluminum in the Temperature Range 50–400°C" 533
G. L. Hunt and I. M. Ritchie

An Observation on the Kinetic Behavior of a Parabolic Type Metal–Gas Reaction with Induced Cracks in the Scale: A Note 539
Moshé H. Zirin

High-Temperature Linear Kinetics of FeS Formation and Reduction in COS–CO–CO_2 Gas Mixtures 545
Steinar Haugen and Aasmund Sterten

On the Transient Oxidation of a Ni–15Cr–6Al Alloy 557
B. H. Kear, F. S. Pettit, D. E. Fornwalt, and L. P. Lemaire

The Oxidation of Ni–7.5% Cr and Ni–7.5% Cr–2.5% Sm_2O_3 at 900 and 1100°C 571
J. Stringer and A. Z. Hed
